

HAVEN CAPITAL GROUP MT5 ACCOUNT LEVERAGE

Leverage may be reduced for new positions opened 5 minutes before and 1 minute after important news events. Leverage for these positions will then be adjusted to account leverage after the time period is over. Floating positions will not be disturbed.

Haven Standard Account Leverage

Equity		Leverage	News (New positions)
From	Till		
\$25	\$10 000	1:2000	1:500

\$70 001	\$100 000	1:200	1:200
\$100 001	N/A	1:100	1:100

EXECUTION POLICY

1. SECURITY IN EXECUTION. Haven Capital operates with variable spreads and all orders are executed at the best available market price.

2. HOLIDAY, WEEKEND EXECUTION, VOLATILE OR ILLIQUID MARKETS. If the market opens with a break off after a weekend or holidays, upon release of important economic and political news, or in the case of force majeure events; orders (sell stop, buy stop, stop loss) are filled at the first available prices in the market.

3. FILLS ON STOP – LOSS AND LIMIT ORDERS. Placing stop orders prior to the release of financial news is not permitted, such orders maybe rejected, deleted, or filled at the best available market prices at that time. Orders (sell stop, buy stop, stop loss) are filled at the first available prices in the market.

4. Trade Size ON MARKET ORDERS. Trade up to 5 million with a simple click, as we will execute market orders up to 50 lots (5 million). However, if you intend to deal in bigger amounts, you will need to split trade size.

5. EXECUTION SLIPPAGE. Slippage occurs when the bid/ask spread changes between the time the order is requested, and the order is executed at. When the order is sent for execution, the specific price requested by you may not be available. In this case, the order will be executed at the first available market price. Slippage happens during high periods of volatility, such as during important news or economic data releases. You should know that 'slippage' is a normal market practice, and we are not responsible for it in any way. Haven Capital assumes no responsibility for slippage occurred because of any problems or technical malfunction of any networks or lines, computer online systems, servers or providers, hardware or software, or any technical failure because of technical problems or traffic congestion on the Internet or the website, or the trading platform.

PROHIBITED STRATEGIES

Cheating Is Prohibited.

Of course, any trading styles that are deemed as “cheating” are not permitted and will result in a violation of our Terms of Service.

Example Strategies That Violate Our Rules

- Tick scalping, high frequency trading, arbitrage bots
- Use of platform or data freezing due to a Demo Server error.
- Use of a delayed data feed
- Trading on delayed charts
- Reverse arbitrage
- Latency arbitrage
- Hedge arbitrage or any emulators are prohibited.

Scalping is permitted; however, we strongly advise traders to hold trades for more than 1 minute to avoid engaging in restricted strategies that violate our rules. If the majority of your trades are held for less than 1 minute, you may fall into this prohibited category, and any profits generated will be forfeited.

These are the most common strategies that we have seen people use to take advantage of trading accounts, though this list does not represent all possible strategies that would go against our trading rules. If any account is seen to be using unfair strategies or an unrealistic trading style, they will not be eligible to withdraw their profit.
